

## The Karma Dahlia ®

The Fred C. Gloeckner Company is proud to present the Karma Dahlia ® Series, a line of **vegetatively propagated** dahlia. Karma Dahlia ® cuttings are **virus-indexed** and come from a **certified, clean mother stock** program resulting in faster and higher production.

The Karma Dahlia ® Series is characterized by its strong, uniform stems, upright flowers, long flowering period, and high productivity. These dahlias are long day plants requiring 14 hours of light per day for flower induction. The series is suited for both indoor and outdoor production. Karma Dahlias ® come in 24 different colors that can be used as cut flowers or in large mixed containers. Depending upon where the Karma Dahlias ® are grown as cuts, 6 to 14 stems per square foot can be expected. In a container program, Karma Dahlias ® can be incorporated into 1 gallon or large patio pots with other spring liner material making a stunning display.

This series is a winner and is a great return of your investment! You will be excited to grow the Karma Dahlias ® year after year.
